

A blue industrial robotic arm is shown in a factory setting, performing end-of-line packaging. The arm is positioned over a conveyor belt that carries numerous light blue plastic bottles. The robot's gripper is holding a row of bottles, and other bottles are visible on the conveyor below. The background is a plain, light-colored wall.

ETTE

**HOME & BODY CARE**

Clean solutions for your end-of-line packaging

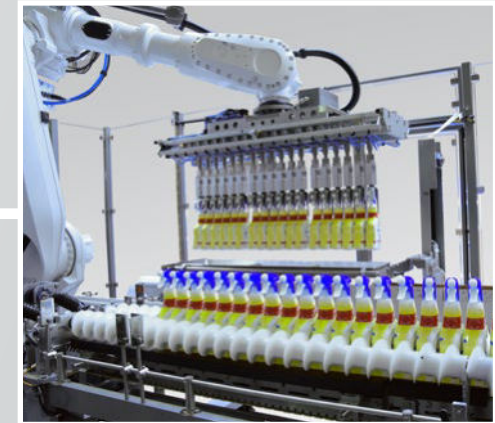

Very high output with **large format range** for a wide variety of **plastic bottles**

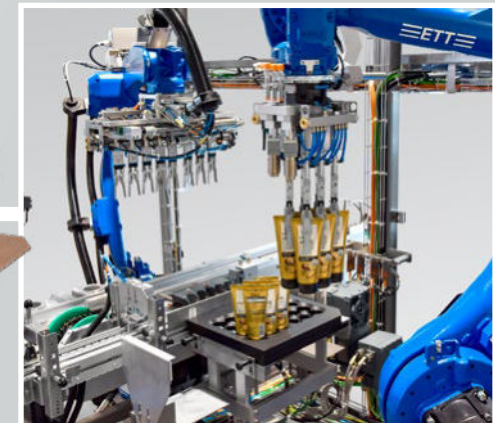

Safe handling with high performance even for **complex products**

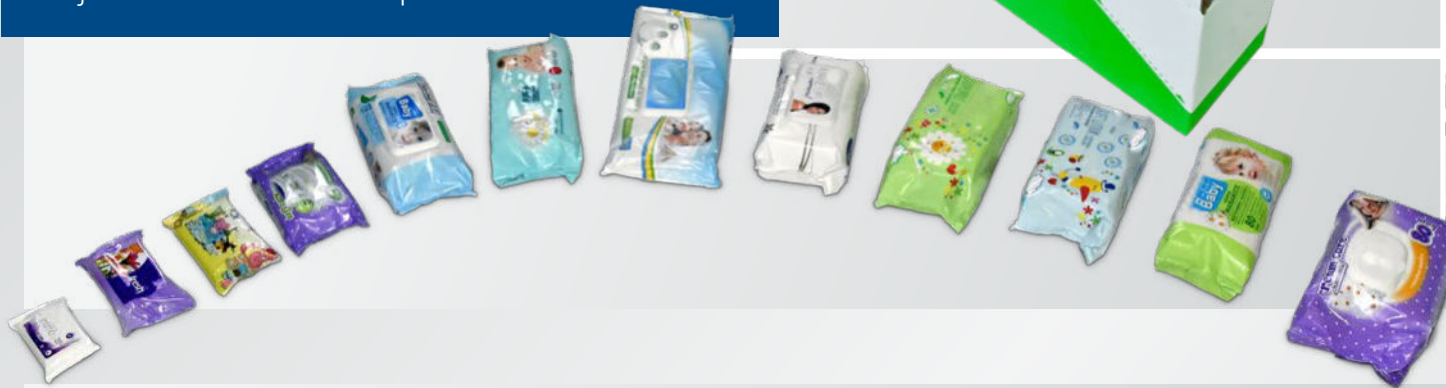

Dynamic collation of trigger bottles incl. rotation and grouping

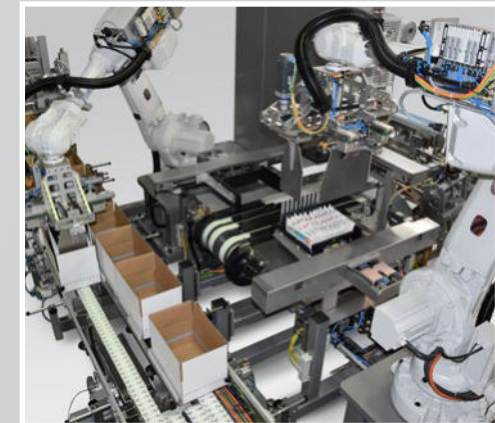

We also offer flexible and economical concepts for lower performances

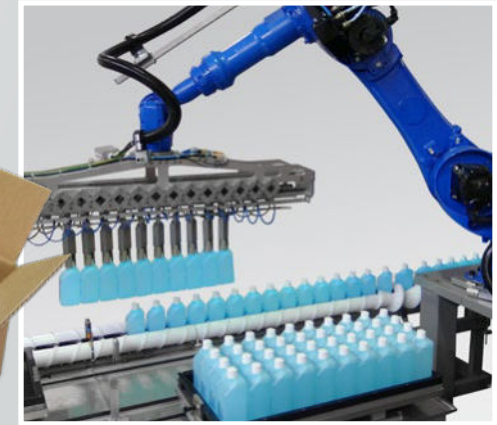

High performance meets **huge range of formats** –  
a job for the ETT Multistep collation

A wide range of **bag types** with  
**quick format changeover**

Row-by-row collation and layer-by-layer insertion for high production reliability

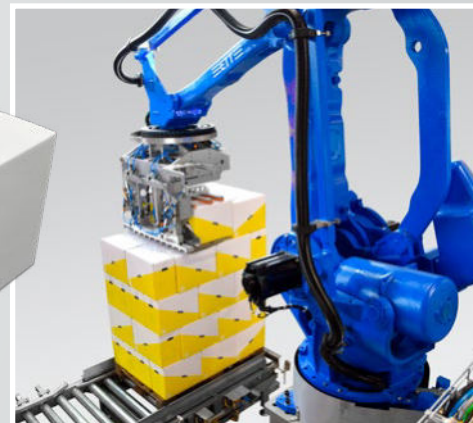

The comb collation as a compact and economical solution for medium outputs

Even **bags with solid or liquid contents** can be securely handled and packed

Once **palletised**, the products are **secured** on the pallet by a **wrapper**, for example

With our wide product range, we do not only have a suitable solution for your packaging task, but we also offer you flexible concepts for smaller outputs or even high-performance systems for your fast-moving items. With us, you are always with the best on the market. Test us!
